

# Deliverables

## STI: WorkPlace – Deliverables (2009)

In our many years of experience we have found that most researchers request the same group of variables for use in their analysis. So we made a decision early on to sell our data in predefined bundles. This allows us to keep our production costs low and pass the savings on to the customer. Bottom-line our customers get more data (more value) for their research dollar.

Due to the volume of data being sold in a bundle, we designed a unique program that archives and retrieves the data based on a series of prompts to the user. The program is MS Windows based and requires only a CD-ROM drive. There is no installation procedure for the program, because it is entirely self-contained.

### Geographies

The data in STI: WorkPlace is keyed to US Census 2000 geographies. If you use geographies based on US Census data prior to 2000, you will need to update those geographies as well. Synergos Technologies offers those geographies in MapInfo® format at a very reasonable rate. Geographies for ESRI® products can be obtained for free from ESRI® directly.

### Variable List (Database Fields)

The following variable list outlines the current deliverable for the purchase of the quarterly population estimate dataset. The data is provided in a proprietary format, which includes a data extraction tool that can access the data at four unique levels of geography (Block Group, Tract, County, and State). Important: This list is subject to change without prior notification.

We are very sensitive to the needs of our clients; therefore in addition to the list of variables shown below we constantly add new items to the list based on discussions with our clients.
